ROLLERS

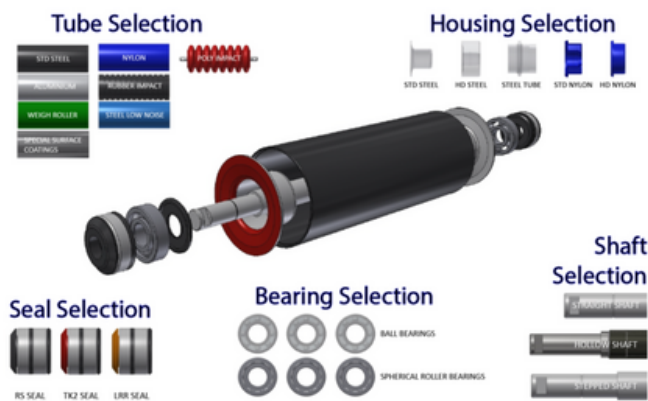

- Boost production with our conveyor rollers, meeting ISO 1537:2006 standards or customized specs for seamless handling.
- Built from electro-welded pipes (63mm to 159mm), our rollers adapt to various conveyor systems.
- Quality labyrinth seals extend bearing life, reducing maintenance and increasing equipment durability.
- Ensure reliable operation in mining, processing, food, printing, pharmaceuticals, and textiles sectors.
- With a 750mm working surface, our rollers optimize material handling for higher productivity.

www.skif.sk

Conveyor rollers manufactured to meet ISO 1537:2006 standards or tailored to individual requirements. Crafted from electrically welded tubes (63mm to 159mm in diameter), featuring a maximum working surface of 750mm. Equipped with high-quality labyrinth seals to extend bearing lifespan, these rollers ensure uninterrupted operation across various industries such as mining, processing, food, printing, pharmaceuticals, and textiles.
